---

Front end developer with 2+ years of professional experience building enterprise web applications and 4+ years of developing applications for personal and academic projects. Hobbies include web development, general programming, and maintaining a home server for learning and self-hosting.

---

## Experience

### IBM — Application Developer Consultant

*April 2020 – Present*

- Developed an Angular application to help Non-Governmental Organizations securely accelerate the relocation of over 2,000 refugees.

### PNC Financial Services

*November 2020 – Present*

- Developing 9 Angular micro-applications for the new retail trading experience: trading applications include account selection, order entry, order status, and holdings; market research applications include quote lookup, equity overview, mutual fund overview, and ETF overview.
- Developing a supplemental Angular library for reusable components, directives, pipes, services, styles, and utilities that are consumed across multiple micro-applications, along with an accompanying documentation application demonstrating and detailing each item in the library.

### Kroger

*October 2020 – November 2020*

- Analyzed Kroger's curbside pickup Watson Assistant data; created daily reports using Python, Jupyter Notebooks, pandas, and PostgreSQL; modified the notebooks to run in Docker and email generated reports using SendGrid.

### United Parcel Service

*September 2020 – October 2020*

- Developed components in a Vue.js application from UI mockups, integrated REST APIs, and wrote end-to-end tests using Cypress.
- 

## Personal Projects

### ApplicationTrackr — <https://applicationtrackr.io>

*September 2019 – Present*

- A web application that helps organize and track job applications using a kanban layout with customizable columns and multiple job boards. Built using Angular, Angular Material, and Firebase.

### Photography Portfolio — <https://github.com/hjbugajski>

*September 2022 – Present*

- A photography portfolio and CMS for Marco Santana built using Next.js and deployed to Vercel, with self-hosted MongoDB and Payload CMS Docker containers.
- 

## Skills

### Proficient

Angular, TypeScript/JavaScript, Node.js, HTML, CSS/SCSS, Git, UI/UX design, Firebase

### Familiar

React, Next.js, Vue.js, Docker, Python, Java, MongoDB, PostgreSQL, MySQL, GraphQL, Payload CMS

---

## Education

### The University of Alabama

*B.S. Computer Science, 2019*
